Admiral Belknap Protecting the King of Corea.

A Naval Force Goes Ashore from the Flagship Swatara.

Washington Authorities Do Not An ticipate Any Fighting.

Other Foreign News-Terrible Dis-aster on the Island of Martinique -American Riflemen Again Honored at Berlin.

By Telegraph to The Times. NEW YORK, July 10 .- [By the Associated Press.] The World prints the following from Yokohama:

Seoul has been occupied by American marines, and Corea is now virtually in the hands of Americans. The unessiness in English and Russian naval circles, which was so pronounced as to render every one on the alert for a fortnight past, is just explained in an unexpected way. Instead of the Russians having occupied Corea, as was generally supposed when the British ships began to puff into the harbor, the United States steamer Swatara, lying off Chemulpo, sent her officers and marines to Seoul. They are now living in the King's palace.

Admiral Belknap was appealed to by the King for protection, and he promptly gave it. Commander McDoran and his staff are feasting with the King and his two American advisers, King and his two American advisers, Denny and Gen. Legendre. The Swatara lies off the city, flying the stars and stripes, and developments are anxiously watched for. The American naval authorities here have taken a great responsibility, and there is a probability that if internal trouble takes a serious turn they will have to fight their way out of the country. THE STORY DOUBTED AT WASHING-

Washington, July 10 .- No information has been received at the Navy Department in regard to the report that partment in regard to the report that Rear Admiral Belknap, commanding the United States forces on the Asiatic station, has undertaken to protect the King of Corea. Belknap's orders were take Mr. Hurd, the newly-appointed united States Minister to Corea, in the facility the Mariara, and to constitute the state of the American subjects.

It is not believed at the department that he has interfered in the trouble between England and Russia further than to establish his forces in the elghborhood of the American con-

neighborhood of the American con-sulate at Seoul for its protection in case of necessity.

AN ISLAND DISASTER.

Martinique City Burned - Many PORT OF SPAIN (Trinidad, W. I.,) une 27 .- [By the Associated Press.]

Details concerning the destruction of the town of Fort de France, in the French island of Martinique, are just received. Immediately after the catastrophe Gov. Cass of Martinique sent an appeal for assistance to the Governor of Trinidad, assuring him that three-quarters of the town was burned, and more than five thousand persons were without homes and food. Aid was at once sent. The fire occurred June 22d. Steamers were sent from St. Pierre to help in fighting the fire, but arrived too late to be of much assistance. Seventeen hundred houses were destroyed, valued at \$2,400,000,

assistance. Seventeen hundred houses were destroyed, valued at \$2.400,000, and furniture, etc., valued at \$600,000— in all, \$3.000,000.

It is impossible at this moment to tell the number of victims. Twelve bodies have been recovered. Many were charred beyond recognition, others fearfully mutilated. Fifteen soldiers are receiving attendance at the hospital. Many were seriously, one fatally wounded. A number of civilians were wounded. Fully three-quarters of the town was destroyed, and seven-eighths of the inhabitants are homeless.

Among the public buildings destroyed are the poorhouse, cathedral, custom-house, town hall, Convent of St. Joseph, Bureau des Revues, slaughter-house and Pointe Simon. A celebrated library was also destroyed.

The various British West Indian Islands have promptly aided with grants and money the afflicted sister colony.

A Census Enumerator Arrested for Neglect of Duty. SAN FRANCISCO, July 10.—[By the Associated Press.] United States Marshal Long arrested this afternoon Thomas J. Fitzpatrick, a census enumerator, for neglect of duty. In Fitzpatrick's returns discrepancies were found, which led to a reënumeration of the district, when six hundred and eight more names were discovered in addition to those he had turned in.

Fitzpatrick states that he found the work too laborious, and it was a physical impossibility for him to complete it, and he so informed the supervisor at the time.

TORIES TIRED OF THE SESSION OF PARLIAMENT.

Several Important Bills to Be Aban doned-Salisbury Urges the Passage of the Heligoland Measure.

By Telegraph to The Times.

LONDON, July 10 .- By Cable and Associated Press. | In the House of Commons today, W. H. Smith, govern-ment leader, stated that in view of the late period of the session, the government had decided not to proceed with the standing order relating to the postponement of the consideration of bills from one session to another. It had also decided to drop the Irish Land-purchase Bill and the Tithes Bill Land-purchase Bill and the Tithes Bill during the present session, but to again introduce them at the next session, which would open in November. Smith said he trusted that before the House was prorogued it would pass the bill providing for the cession of Heligoland to Germany, the Local Taxation Bill, the bill providing for housing the working classes and the Census Bill.

Bill.

Sir William Vernon Harcourt said he hoped the government would consult the House about holding a meeting of Parliament in November.

Mr. Gladstone expressed a similar

wish.

Smith said that the government was satisfied as to the convenience of the session opening in November.

The Press Association announces that arrangements for the reconstruction of the Cabinet are making programment. tion of the Cabinet are making prog-ress. Smith, the present government leader, will be elevated to the peerage and will probably be succeeded by Lord Randolph Churchill as govern-ment leader in the House. Harting-ton has again been offered the office, but has declined. Salisbury went to Windsor Castle last night and obtained the Qeen's assent to the proposed changes.

changes.
THE CESSION OF HELIGOLAND. In the House of Lords this evening Lord Salisbury moved the second reading of the bill providing for the cessio of Heligoland to Germany. He generally belittled its importance to England and magnified the advantages to be derived from its transfer. Referring to the African clauses in the ring to the African clauses in the Anglo-German agreement, he argued that as long as Witu was in the hands of another power English interests to the northward could be interfered with. Under the convention there was not the slightest chance for such interference until the confines of Europe were reached. He urged that an exclusive English protectorate over Zanzibar would assist in the suppression of the slave trade, and develop the commerce of England and India. There was no reason, he said, to apprehend any difficulty over the convention with at as long as With was in the hand any difficulty over the convention with any European power. After debate by Lord Rosebery and Earl Kimberly the bill passed its second reading.

PANDEMONIUM REIGNED.

Bloody Scenes in the Harqua Halla Mining Camp.

SAN FRANCISCO, July 10.—[By the Associated Press.] The Chronicle's Phœnix (Ariz.,) special says: The mining camp of Harqua Halla is in this county, about a hundred miles north of Phonix. Harrisburg is six miles from the mines, being the milling point. The Fourth was so patriotically observed that every one in the camp got drunk and pandemonium reigned. Fights were constantly in progress. Two gun fights were interfered with, and the day closed by a Mexican named Juan Doetz sinking a sharp ax into the brains of Antonio Martinez, also a Mexican. The murderer is in jail.

Late this evening the following telegram was received here by Deputy Coroner Wells from the Sheriff of Yuma county: "Another man murdered at Harrisburg. All details are wanting." that every one in the camp got drunk

Mrs. Paran Stevens Robbed NEWPORT (R. I.,) July 10.-Mrs. Paran Stevens is reported to be the victim of a heavy diamond robbery. and detectives are now working on the case. The amount reported missing is variously estimated at from sixteen to forty thousand dollars. This report is thought to be exaggerated, and five to eight thousand dollars is nearer the correct figure. There are peculiar features in the case.

England's Course in Sending Cruisers to the Shores of This Coun-try Denounced as a Bulldozing Attempt,

By Telegraph to The Times.

SAN FRANCISCO, July 10 .- [By the Associated Press.] A private letter received in this city from Victoria today states that the general opinion prevails there that two fleets of sailing craft have been fitted out, armed and equipped and sent to Bering Sen to aid British sailing vessels to resist capture

by American revenue cutters. The Corwin is at Victoria awaiting salling orders, and the information has been received that the cutter Oliver Wolcott, which has been undergoing repairs at Seattle, has been ordered to make ready at once and proceed to Bering Sea.

NOT TO BE BULLDOZED.

England's Menacing Tactics Over the Bering Sea Affair.

New York, July 10.—[By the Associated Press.] The Tribune's editorial on Bering Sea tomorrow will say: 'Congress has acted wisely in calling for the correspondence on the controversy. There is evidence that Lord Salisbury is advancing some most absurd contentions. There is some reason to believe that a certain quality of menace is imparted to his latter tones.

menace is imparted to his latter tones.

Some curious military and naval operations have been going on lately about our coast. Great Britain has been strengthening her splendid defences at Halifax, increasing the military and naval forces there, adding to her fleet at the Bermudas and Bahamas, and Bending a considerable squadron to Bering Sea. If she desires this display to be interpreted by the United States as a menace, she is engaged in a foolish and regretable business.

"It is not agreeable to a spirited people to feel that an effort is being made to awe them into submission by a display of the engines of force. We can imagine no proceeding on England's part more likely to convince the American people that Boring Sea is a mare clausum than the presence of British gunboats in the neighborhood of our Pribyloff Islands. We can fancy no demonstration admirably calculated to unite this country in resolute determination in its extreme demand than the sight of British cruisers hovering around our Atlantic Coast. It is desirable that Great Britain should apparent and the sirable that Great Britain should apparent. around our Atlantic Coast. It is desirable that Great Britain should appreciate this point. Americans cannot suppose this unusual congress of warships is an expression of genuine Britaish friendship. But whatever it means, it serves no good purpose, and the British government will do itself a fa-vor by ordering its cruisers away."

DESIRABLE IMMIGRANTS.

The Hollanders Who Will Settle In Merced County. NEW YORK, July 10.—[By the Associated Press.] "I am on my way to California to make myself a home,"

said Elbert Van Baartens from Rosterbeek, Holland, today. "For the last year preparations have been making to found a new town, Rotterdam, in Merced county, Cal. The first step

was the formation in Holland of the California Land Company, incorporated under the laws of California. It has bought a large tract of thoroughly irrigated land in Merced county.

"This land is divided into parcels of twenty-five acres, and is only sold to Hollanders and costs them \$175 per acre. This class of immigration is rather different from anything in history. The poorest man who has come over left Rotterdam with sixty-four others and had \$3000 cash. I shall start for California early next week with about forty others in a special Pullman train. Our first act will be to take out our first papers.

ruiman train. Our first act will be to take out our first papers.

"There is not one among us who will not make a first-class citizen, or whose character at home was not above represent. There are no cripples, no imposed. beciles, no paupers. We shall have the assistance of experienced Califor-nians to teach us such modifications of the agricultural methods as the differ-ent climate and other conditions may require. The enterprise is very popu-lar among the most consistent men lar among the most conservative men all over Holland."

HURON (S. D.,) July 10.—The Independent convention adjourned today

pendent convention adjourned today after nominating the following ticket: Governor, H. L. Loucks; Lieutenant-Governor, B. L. Van Osdel of Yankton; Treasurer, Frank Roberts of Millbrook; Auditor, Capt. Low of Bijou; Secretary of State, Henry Hanson of Harvard; Attorney-General, S. W. Cosand of Gettysburg; Superintendent of Public Instruction, E. A. Dye of Redfield; Commissioner of Public Lands, F. F. Meyers of Alpena; Commissioner of Labor, J. W. Johnson of Aberdeen; for Congress, W. F. Leavitt of Lincoln county. The convention refused to make any indorsement for United States Senator.

United States Senator. Chicago Brewers at War. CHICAGO, July 10.—A local paper says a big fight is on among the brewers in this city. It lies between the ers in this city. It is between the English syndicate, which has bought up a number of the largest breweries in the city, and some of the small breweries, and the result of the fight so far has been a dropping of prices from \$8 to \$8.50 per barrel, brewers outside of the syndicate inaugurating the cuts.

The Fisher-Thompson Suit Decided by Judge Van Dyke.

C. L. PISHER SEVERELY SCORED.

ision for the Plaintiffs in the Case of Dobinson et als. vs. ... McDonald-Pretty Little Legal Fight.

Judge Van Dyke yesterday rendered a decision in the case of Mrs. Madie E. Fisher against Mrs. L. M. Thompson and Timothy Baker, Jr., in which the plaintiff sued for judgment for money alleged to be due from the defendants.

The Court in rendering the decision states that the plaintiff did not, prior to October, 1885, or at any other time, advance to the defendant, Mrs. Thompson, 26627.25, or any sum of money whatever; that there was no agreement or understanding, either expressed or implied, that the plaintiff was to advance any sum of money to be invested by Mrs. Thompson in a lot and the house to be built thereon; that there never was an understanding that the deed of any propunderstanding that the deed of any property was to be held in trust by Mrs. Thomp-son for the benefit of the plaintiff; that the lot was bought by her and the full purchase

lot was bought by her and the full purchase price was paid for it by her, out of her own separate funds.

The findings further state that Mrs. Thompson was not of weak or unsound mind, as alleged, when she executed a deed of the property to Timothy Baker, Jr., but that she made it for a valuable consideration, and knew perfectly well what she was doing. That she subsequently executed a mortgage for \$6000 upon the property all of which was received by C. L. Fisher, and that \$1500 is still due on it by him.

As a conclusion of law the Court states that the defendant does not and never has held the property in trust for the plaintiff, as he claims, and that at the date of the commencement of this action, the plaintiff had no right, title or interest in the property, and never has had any, and is not entitled to any judgment or decree. A judgment and decree for the defendants is therefore ordered.

and never has had any, and is not entitled to any judgment or decree. A judgment and decree for the defendants is therefore ordered.

Judge Van Dyke, in addition to rendering the findings in writing, made some remarks orally, in which he handled C. L. Fisher, husband of the plaintiff, without gloves. He briefly alluded to the evidence and the claims of Mr. Fisher to have been acting as the agent of his mother-in-law, Mrs. Thompson, and said that, from his own evidence, he had acted in such a way that, whether on the witness stand or off, his statements could not be taken as true. He made it very plain that he regarded the conduct of Mr. Fisher throughout the whole matter as very questionable.

THE SANTA MONICA RAPE CASE.

A very pretty little fight was carried on in Department No. 6 of the Superior Court yesterday, when Thomas A. Brooks came up for trial on the charge of rape. This is the case in which the defendant is accused of running off from Santa Monica with Anna Caskey, a 13-year-old girl, and having a mock marriage ceremony in Los Angeles. An account of the escapade was published at the time it happened, April 1st last.

in a suit wherein G. A. Dobinson, J. A.
Fairchild and T. E. Rowan were plaintiffs and E. N. McDbnaid was defendant. The case attracted considerable attention at the time it was begun, on account of the prominence of the parties, interested, and also because of the peculiar nature of the allegations contained in the complaint, who is a wealthy landed proprietor and old resident of this county, the perpetration of a swindle of the slickest kind, that would have escaped detection but for an accident.

The evidence given on the trial went to show that McDonaid had given the plaintiffs a contract in March, 1886, authorizing them to sell his ranch of 4200 acres near Wilmington for \$126,000, and agreeing to pay them \$5000 in case he or they sold it inside of a year from the date of the contract. It was further shown that McDonaid came to the plaintiffs in December of the same year and by dint of the strongest representations to the effect that he had changed his mind about selling, and would not sell, and was heartbroken on account of the death of his son, which had just taken place, succeeded in working upon the sympathies of the real estate men so successfully that they, times being pretty rood, accepted \$1000 and surrendered their contract, believing that the old gentleman was telling them the truth, and having no idea that he was putting up any job by which he could make \$4000 out of their trust in his integrity.

It appeared however that at the time when Dobinson et al. were induced to surrender their contract the ranch had been actually sold by McDonaid to H. H. Boyce, who in company with Clarence J. Richards afterward cut up the property and sold it in lots. The proof of the date of the sale was not, however, forthcoming until the famous libel suit brought by H. H. Boyce against the Times-Mirror Company was tried, and they value of that plaintiff's reputation was judicially assessed at one dollar. In that suit, among other transactions of Boyce, his ranch to Boyce. This was enough to by Messrs. Dobinson et al.

THE HANDY SHOTGUN.

A complaint was filed yesterday before Justice Savage in which John Doe Devosini Battista is charged with exhibiting a deadly weapon. The complaining witness is J. E. Blacklaw of Whittier. He charges that July 5th while at Puente mills the defendant threateningly presented a shot-gun toward himself and Castino Gaetano.

It was ascertained that the defendant rents land from Gaetano and adispute has arisen between them about it. It is alleged that Battista had before threatened to kill Gaetane, and met him on the 5th with Mr. Blacklaw, at the end of some rows of corn, and barred their further progress with his shotgun. Officers went out yesterday afternoon to arrest Battista and bring him to the city to answer the charge.

THE ELECTION OF SECRETARY.

Report on the San Jose Rail-road Convention-Condition of the Streets Discussed.

The board of directors of the Chamber of Commerce held a lively meeting yesterday afternoon. There were eighteen members out of the twenty-one present, and they made things quite warm for everything in sight. E. Germain, president, and Secretary Pattern were present. ary Patton were present.

The minutes of the last meeting were

read and approved, after which the report of the finance committee was read and ap-

proved.

The matter of buying a horse for the chamber wagon was discussed and referred to a committee composed of Capt. A. W. Barrett and Maj. Toler, with power to act.

THE SAN JOSE CONVENTION.

Capt. Barrett, as châirman of the delegation to the railroad convention in San José
on the 26th of last month, asked to be altion to the railroad convention in San Jose on the 26th of last month, asked to be allowed to make a report. He stated that the object of the meeting was to induce the Southern Pacific Company to close the gap in the coast line between Santa Margaretta and Eliwood, a distance of 127 miles. The convention passed a resolution offering to donate the company a right of way and \$815,000 if they will agree to finish the road as soon as possible. The railroad people informed them that they are willing and anxious to complete the road at the earliest possible date, but they want to know that the road will pay interest on the bonds for the outlay during the next three years. Capt. Barrett said the convention believed that the sum they propose to raise will more than pay interest on the bonds, and he asked that a committee of three from Los Angeles be appointed to work with the committee that will be appointed from the various counties along the line of the new road.

The chair appointed Capt. Barrett, Councilman Wirsching and T. A. Lewis as such committee, and instructed the secretary to notify Eliwood Cooper, president of the general committee.

In answer to a question, Capt. Barrett said that he and other members of the committee had a talk with Col. Fred Crocker, and that gentleman told them that he will do all in his power to induce his associates to complete the road as soon as possible. The press of San Francisco, and as soon as they find that the Santa Fé will extend the Atlantic and Pacific to that city they will probably withdraw their objections.

Mr. Wells spoke at some length on the failure of a number of the members to attend the regular monthly meetings, and thought something should be done to bring them together. There are about five hundred members on the books and it is almost impossible to get a quorum. He believes the chamber will go to pleeds if something is not done.

It was suggested by other members that the way to get the members to take an interest in the chamber is to give the committees more work. If there is no business to attend to it will be necessary to make business.

STREET WORK.

Gen. Mathews spoke at some length regarding the move on the part of the city to re-cutter Broadway and Spring street. Property holders have just been assessed to grade these streets, and he did not believe that they should be compelled to go to a great expense at this time to repair work that should be kept up by contractors. The matter was referred to the committee on boulevards.

Mr. Hughes spoke of the stable filth that is always found at the Nadeau crossing. He stated that the crossing is in such a condition that it is impossible for people to pass.

dition that it is impossible for people to pass.

Mr. Eaton promised to call the attention of Maj. Bonsail, chairman of the Board of Public Works, to the matter.

Dr. Widney also took up the Nadeau-house crossing, and stated that the side-walks around that house, especially on the First-street side of the building, are a disgrace to the city. The peanut-stand and the stairway that leads to the cellar are an expesore to the public, and should be removed. He asked that the Council be instructed to close up all stairways to cellars that are not being used, and to properly clean the sidewalks. He put it in the form of a motion, which was unanimously adopted.

At 9 o'clock the deputies all assembled in the private office, where a pleasant presentation took place to the retiring clerk, and a welcome to the new.

The eccasion might have been a formal ene had it not been for the presentation speech by Mr. Mappa. Robed in his patriarchal long linen duster and summer hat he hung the gift, a very handsome traveling bag with toilet articles, on his arm and, marching 'into the office, addressed Mr. Dunsmoor:

"We have heard that you are going traveling, Charley, and the boys say you had better take this and git."

The Newboys' Home.

The Newboys' Home.

A meeting in the interest of the Newsboys' Home will be held at Temperance Temple this evening. Mayor Hazard will preside, and several well-known gentlemen will make addresses, besides which there will be an interesting musical and literary programme. The home is sow in operation, but money is needed to carry on the work, and it is hoped that every one interested in the work will turn out, and assist in making the meeting a success.

Found Guilty.

Found Guilty.

Mealey and Elliott, the East Los Angeles Mealey and Elliott, the East Los Angeles "holiness" preachers, arrested for disturbing the peace several nights ago, came before Justice Austin yesterday afternoon, and after a trial lasting two hours, were found guilty and committed to the bastile until today at 11 o'clock when they will be sentenced. Both men declared that they were being persecuted, and would go to jail as martyrs in the cause, insisting that they would be delivered in due time.

Tom Cook Dead.
Thomas A. Cook, for several years past a prominent figure in local Republican politics, died yesterday of consumption, aged 47 years. Mr. Cook was a native of Philadelphia, but afterward moved to New York, where he enlisted in the Union army April 23, 1861, serving four years five months and fourteen days, being dis-charged at Washington. He will be buried in this city.

How Horses Are Graded [Prairie Farmer.]

It is not generally understood that in the city horse markets are graded as corn, wheat, sugar and coffee are graded; and it matters not what imas corn, wheat, sugar and conce are graded; and it matters not what impression a farmer may have regarding the qualities of any horse he may be sending forward to market, the horse, upon arrival, will at once be graded, and that, too, with as much precision and accuracy as are the grains and goods named. There need be no appeal from this, for this grading is not based upon any whim or notion of the dealer. On the other hand, there is a general contour, an air of style or its opposite, an elastic springing galt, and not half a dozen steps are required to enable the experienced dealer to rate the horse, in this regard, precisely where he belongs. Then, again, the animal carries evidence of his breeding; if well bred, on his face, in his hoofs and limbs—in fact, everywhere. The indi-

The Gapes Again.

[Farm and Fireside.]

So many write us for remedies to prevent or cure the gapes that we are compelled to occasionally repeat some of our admonitions. We will now try to give a few rules in a nutshell. 1. Scatter air-slacked lime freely over the ground occupied by chicks. 2. Put a little of the lime in the drinking water. 3. Should signs of gapes appear, feed the chicks twice a week with stiff cornmeal dough, first intimately mixing a teaspoonful of spirits of turpentine with a quart of the meal. 4. Give a very sick chick a drop of tarpentine on a bread crumb, 5. If this fails then strip a feather, leaving a small tuft on the end of the feather in the windpipe, and quickly withdraw it. 6. Feed on clean boards. 7. Never allow residum of food to remain on the ground. 8. Keep the ground clear of filth. 9. The rich, moist places, such as are favorable to gapes, 10. Do not mistake lice for gapes, as the big, gray lice on the skiu of the heads and necks will often cause the chicks to gap from weakness. It is not an easy matter to insert a feather down the throats of a large number of chicks; hence, the best wholesale method is to give the turpentine in corn meal, and to use plenty of lime on the ground, as the lime will destroy all germs of gapes.

IBanning Herald.

On Monday afternoon we took part in a harvest pageant. We rode on the biggest vehicle and behind the biggest team that we expect ever to participate with again this side of some political demonstration in the next world. Dan Scott is operating this year a combined barley header, separator, thresher and sacker on his ranch. It is a stupendous aggregation of agricultural implements, some twenty-five feet wide by eighteen feet long by ten feet high. It cuts a swath sixteen feet carries three or four men, and drops three bags of grain at a time. It is drawn by twenty-six horses, and as it moves across the field looks like Abraham and his tribes of old migrating with his herds in front and his bedding and concubines piled up behind.

Spade Up the Yards.

Spade Up the Yards.

[Farm and Fireside.]

"Spade up the yards" should be a sign on every poultry fence. In no other manner can disease be better prevented than by occasionally spading or plowing the yards, and at no season is such work more important than in summer. Before so doing scatter lime freely on the surface, and then scatter it again over the ground after spading. Lime prevents roup, gapes and cholera.

NEW YORK has been suffering from the hottest weather known there since 1876. One hundred and one in the shade means something different there from what it does in Los Angeles.

THE movement of Hollanders to Merced county, in this State, is quite an important one. They are all educated, wealthy people, who bring their families and intend to become citizens. California can afford to heartily welcome such an acquisition to her population.

As was fully expected, the Louisi ana Legislature has had its own way in the lottery business. It has got around the veto of Gov. Nichols, and in such a manner! The patriotic and statesmanlike veto of Mr. Nichola is actually made to appear as a crime. The Judiciary Committee Louisiana Senate reports that the Governor has done very wrong in at tempting to veto a proposed amendment to the Constitution. Such infringement is declared to be "alive with great and distressing danger to the liberties of the people!" Therefore the veto is returned, and the House concurs. Verily, great is King

Boodle, and Hypocrisy is his prophet In Cincinnati the city has a general ordinance by which every street rail way on January 1st of each year is required to pay into the treasury \$4 per lineal foot for each and every car running on its line, and the payment of this amount is made a condition prece dent to the operation of the road. Each railroad is also required quarterly to pay over 21 per cent. of the gross earnings from every source. The roads are making money and the marragers even talking of 3-cent fares to head off cable and elevated enterprises. The city gets a good income and the people get good service. If Los Angeles had introduced some such plan as this, our municipal taxes would be much lighter

SECOND-STREET CABLE ROAD.

Since the Second-street cable railroad ceased operations citizens who have built themselves attractive homes on the hills, under the guarantee ready communication with the business center, have experienced much inconvenience. Many efforts have been made to have the line started up again, but so far without avail. There now seems to be some prospect of effecting this object. H. C. Witmer has made a proposition for a cable road on Second street, from Broadway to larnell street, to the effect that if the parties interested will subscribe the sum of \$35,000 Mr. Witmer agrees to build and equip a first-class double-track cable railway over the route above mentioned within twelve months. part of the plan contemplates the raising of Second street at its junction with Pearl street, and otherwise putting Second street upon a better grade, so as to obviate the obstruction

by storms heretofore experienced. Mr. Witmer guarantees the road and equipments to cost not less than \$200,000. The object of securing the subscription is to clear the old road of indebtedness, and provide for tearing up and removing the old material, which is useless. Mr. Witmer does not ask the subscription to help him build the new road, but to enable him to get possession of the roadway, clear of incumbrance and rubbish. No money will be asked for until the cars are running; and very liberal terms will be given to those who may wish an extension of time after their notes ma-

ture. The offer appears to be a liberal one; and it is fortunate for the residents of the Crown Hills district that one of their citizens is able and willing to make this proposition. All previous efforts to enlist capitalists in this enterprise have failed, and if those interested in securing the Sec-ond-street cable road know a good thing when it is offered them, they will not let the proposition fail for lack of a little effort. Soliciting committees are now at work to secure subscrip-

THE CRITIC IS ABROAD.

A few days ago we drew attention to the novel character of the Fourth of July oration delivered in San Francisco cisco by Mr. Cator, who en-larged upon many evils ex-isting today in the Republic. This was not by any means a solitary instance. From many quarters comreports of speeches delivered in a similar vein. Thus, at Santa Rosa, Henry E. Highton, in the course of his oration

E. Highton, in the course of his oration said:

From one end of the Republic to the other labor and capital, naturally silies, are organized, antagonistic and mutually default. Capital aggregates and forms trusts and syndicates, which monopolize products and oppress the masses. Labor consolidates its forces and distribt both production and distribution. Fortunes are created beyond "dreams of avarice," and having exhausted the pleasures of accumulation, Dives aspires to exclusiveness, privileges and reactionary revolution. Too frequently he despises the equality of his own country, and transfers his wealth and his affections. Old men, who are imitated by the young, spend their last days in graduated sensuality, and arrogantly seek to buy their immortality and their haspiness. The judiciary, distrusted, occasionally corrupt, are driven or led into alliances with monopoly or license. The public lands are seized in immense bodies through subsidies, through fraud and through collusion. Over-education without industrial direction produces the parasite, the office-seeker, the hoo-dium, the licentious droues of metropolitan communities, the bully and the beggar, until, like the Siamese twins, blatant demagogues assume the functions of leaders. The cities are crowded with tax-enters and property-eaters. Bosses run nunicipal, sometimes State, never, so far, national politics, and—themere figure-heads of more obscure but more powerful criminals behind them—bleed alike the mercenaries and the public, and render fraudand dishonesty so respectable that critiof more opecute mais behind them—bleed alike the mais behind them—bleed alike the mais cenaries and the public, and render fraud cenaries and the public, and render fraud themselves to respectable that critical and the same of the sam

MURRAY THE MAN.

And still they come. The Ontario Record has now joined the ranks of those who support Gen. Eli H. Murray for Congress. That journal says:

for Congress. That journal says:

The sentiment in the Sixth Congress District is rapidly crystallizing in favor of Gen. Eil H. Murray as a candidate for Congress. The primaries in San Diego county are to be held on Saturday, and the press of the district should put itself on recerd in an unstakable manner. The fight in San Diego is a bitter one, and the Republicans of the county ought to understand clearly that Mr. Bowers is not acceptable to the district at length why this is true, but the fact is patent and ought to be faced by every kepublican of San Diego county when he casts his vote on Saturday.

If San Diego elects a Bowers delegation, it throws away, its chance of securing the Congressman; that is the plain Knglish of the situation. Los Angeles and a large part of San Bergardino county will favor a Freeno man rather than Bowers, and his

the situation. Los Angeles and a large part of San Beraardino county will favor a Fresno man rather than Bowers, and his most ardent supporters had better let this fact percolate into their excited understandings, and cook their enthusiasm.

Gen. Murray is a broad and an able man, with a public record that is both clean and honorable. He is free from entanglements with factional local fights, such as would lose him votes; and if nominated he would command the cordial and united support of nis party in all portions of the district. He would go to Washington with a national reputation that would insure him recognition at the start, and his abilities are such that his influence, and consequent usefulness to the district would strengthen.

it might be, but he is evidently no fool. INTERVIEWED in the Examiner, Mr. Boss Buckley intimates that he will withdraw from the details of political

management, the strain being a than he can stand. He said that Democracy in San Francisco is the most thoroughly and systematic organized body in the United States and added:

The Democratic politicians of West Virginia are reported to be much agi-tated at the outlook. And there is good reason for their uneasiness, for the Democratic Governor was counted in by such a narrow margin a year ago that a change of 150 votes would place West Virginia on the Republican side of the fence to stay.

By Telemanh to The Times.

Sr. PAUL, July 10 .- [By the Associated Press.] The third day's session of the Educational Association was called to order promptly. The committee on nominations reported in favor of William R. Garrett of Nashville for president. Among the vicepresidents are J. M. Baker of Denver, and E. B. McElroy of Salem, Or. The secretary is T. H. Cook of New Brunswick, N. J., and a director from each State is represented in the convention. Archbishop Ireland of St. Paul read the first paper on the topic of "State and Parish Schools; Is a Union Between Them Impossible?"

vania, is the most popular Democratis opening speech he declared in the Keystone State. He was elected Governor when the Republican party split some years ago.

Between Them impossible in the property of the constitution, and said he upheld the parish schools, but would have all schools State schools. The imparting of instruction to the child is primarily the function of the parent. The State intervened whenever the family could or would not do the work needed. He unreservedly favored State laws making instruction compulsory. Instruc-tion was so much needed by each citi-zen for his own sake and for that of society that the father who neg-lected to provide for the child's in-struction sinned against society, and it behooved the State to punish him. Of course, he said, the parent enjoyed the right to educate his child in the manner suitable to himself, provided always that the education given in this manner sufficed for the ulterior duties of the child toward himself and This, he said, was his grievance against the State schools of today. There could not be religious teaching where there was the principle of non-sectarianism. It followed, then, that the child would grow up in the belief that religion was of minor importance. Beligious indifference would therefore be his creed. The State need not teach religion, but for the sake of its people and for its own sake it should facilitate and permit action of the church, but thindered this action. As a solution of This, he said, was his grievance agains permit action of the church, but it hindered this action. As a solution of the difficulty he would permit regular State schools with the religion of the majority of the children of the land. They would be and would do as they do in England, pay for sectional instruction given in denominational schools according to results; that is, each pupil passes an examination before State officials in full accordance with the State programme.

In conclusion the Archbishop protested against the charge that the schools of the Nation have their enemies among the Catholics. The Catholies are loyal to the country, and demand Christian State schools.

given the minority that this measure will not be pushed, no factious opposition will be interposed to the speedy disposal of the Tariff Bill, River and Harbor Bill and the remaining appropriation bills, and an adjournment will be taken at an early day.

The outcome of the caucus was a decision to conclude consideration of the pending shipping bills, and then take up the Sundry Civil Appropriation Bill. There was a prolonged debate respecting the places to be assigned the Tariff Bill and River and Harbof Bill, as well as the expediency of considering the National Election Bill at this session. No decision was reached, as it was believed before the matters above referred to are disposed of the Democratic policy will be sufficiently revealed to guide the Republicans in formulating measures to meet the situation. The speeches tonight show there was a decided majority for the Federal Election Bill, and it is said no one strongly objected to it, but a fairly good number showed a great deal of lukewarmness on the subject.

There was almost unanimity in the belief that it will be absolutely necessary to adopt the cloture rule in order to pass the bill, and Senators Edmunds, Teller and a few other old Senators thought this would outweight the benefit to come from the bill's passage. Senator Edmunds suggested sitting it out, but it soon developed that, for one reason or another—some said plainly hot weather—many did not propose to do this. These Senators

that, for one reason or another—some said plainly hot weather—many did not propose to do this. These Senators favored "morning business" or adjourning. It was from the West that the indifference to the bill came, though at least one—and it is said two—eastern Senators were by no means favorable to it. Senator Aldrich was favorable to it. Senators Aldrich and Ingalis of the committee were among those who favored the rule to stop debate, and Senator Teller was even more determined in his opposition to it than Senator Edmunds.

Houses,

The Senate Again Occupied with the Silver Problem.

Conference Report Adopted, 39 to 26,

The House Passes the Day in a Long Acrimonious Political Discussion - Very Little Busi-

By Telegraph to The Times.

WASHINGTON, (D. C.,) July 10.-[By the Associated Press.] Senate.—The Senate resumed consideration of the conference report on the Silver Bill, and was addressed by Mr. Morgan in opposition to the report. He expected today was to be the crisis in the question of the currency of the United States, as much so in regard to the demonetization of silver and confining of coin to the single gold standard as was the act of 1873. He did not know but the effect of the vote to be taken today, if it should result in the adop-tion of the conference bill, would not be really more fatal to the prospect of silver coinage in the future than the act of 1873. The legislation of 1873 had been, he said, an act of cold-blooded assassination of the silver dollar. It has been presided over by the same Senator whose "fine Italian hand" was to be seen in the confer-ence bill—the bill which was to be a departure from the action of both House and Senate—and was essentially as new as if it had been a novel written by the Senator from Ohio within the last five days.

Mr. Morgan went on to speak of legislation on all important matters being now entirely controlled by the conference committee, a committee of arbitration in which proceedings were secret, so that if such committee was bribed to the extent of \$100,000,000 no Senator would be permitted to find it out.

Senator would be permitted to find it out.

This statement was challeged, and caused some side talk between Messrs. Morgan, Allison and Sherman.

Mr. Morgan resumed his argument against the conference bill, and called the attention of the friends of free colnage, particularly the Senator from Colorado (Mr. Teller) to the fact that the same "fine Italian hand" which framed the act of 1873, operated in the conference bill to destroy utterly any hope of remonetization of silver so long as it remained unrepealed. He predicted that when others of the conference came to realize what they had done they would feel like kicking themselves over a ten-acre field. The bill would monometallize the country, would make gold the only thing with which to pay debts or buy property. The craft of the Senator from Ohio could not (after twelve months' consideration) have fixed up a bill that would more thoroughly destroy silver forever as a money.

Mr. Morgan spoke for three hours, and closed with an appeal to the Senators not to allow the Senator from Ohio (Mr. Sherman) to thrust his stiletto into silver.

Mr. Call also argued against the conference report.

letto into silver.

Mr. Call also argued against the conference report.

Mr. Plumb spoke in its favor; The conference bill, he said, would give the country as much money during the next year as free coinage would give. The bill was a long step in the right direction. It was his belief, if the bill becomes a law, so nicely and easily will it work, and so helpful will it be to the people of the United States, that the next step will be free coinage. He would hope for a coinage bill regretting that this is no better, glad it is no worse.

After further debate a vote was taken, and the conference report was agreed to—yeas, 39; nays, 26, as follows:

The following pairs were announced:

House.—The Democratic programme was carried out by Mr. Outhwaite of Ohio raising the point of order of no quorum. The Speaker glanced over the array of empty seats, and responded dryly: "The point is well taken."

Mr. McCreary of Kentucky moved a call of the house. He was not sustained by his party colleagues, however, and on a viva voce vote the motion appeared lost.

Mr. Allen of Michigan demanded the years and nays. The vote resulted: Yeas, 115; nays, 70. One hundred members were announced as paired on this vote.

A quorum having appeared. Mr. Mc.

A quorum having appeared, Mr. Mc-Creary moved to dispense with further proceeding under the call, but was antagonized by his own side of the House, and on demand of Mr. Bynum of Indiana the yeas and mays were ordered.

Further proceedings under the call were dispensed with—yeas, 129; nays, 59—and the journal of yesterday's proceeding was read.

59—and the journal of yesterday's proceeding was read.

Mr. Enloe of Tennessee asked to have the journal corrected, in that it recorded that on a certain vote he was present and not voting. He was not present at any time during that vote.

Mr. Rogers of Arkansas made this the text for an attack on the Speaker. A few days ago the House had listened to homilies on free ballot and a fair count. Why, a fair count could not be obtained even in the House. He then proceeded to quote from and comment on Speaker Reed's article in the North American Review on contested elections. He regarded the article as an apology for the Elections Committee. Commenting on the fact that the recently-seated members voted for the Federal Election Bill, he said he was reminded of the scriptural quotation. "Well done, thou good and faithful

servant; enter thou into the joy of the Lord" (pointing to the Speaker).

The journal was then amended as suggested by Mr. Enlos.

Messrs. Fithian and Williams of Illinois then rose to nave the journal corrected, but Speaker Pro Tem Burrows recognized Mr. Cannon, who moved the approval of the journal, and demanded the previous question. The previous question was ordered—104 to 58, the Speaker counting a quorum.

Messrs. Fithian and Williams then spoke at some length about the error in recording their names, both stating that they were not present during rolicall.

in recording their names, both stating that they were not present during roll-call.

Mr. Cannon replied that made no difference. If the rules could be evaded by a man stepping out of the House at the second before his name was called, and stepping back after it had been called, the rule amounted to nothing. The gentleman had been present by his own showing, and even if he were not, there was a quorum, without him. So he (Mr. Cannon) did not see what harm there was in moving the previous question. Ever since the day before yesterday the Republicans had been trying to do business. This morning the witty gentleman from Arkansas (Mr. Rogers) wasted an hour scolding the Republicans. It was obvious that the Democrats did not want to legislate. They did not want to legislate. They did not want the Diplomatic and Consular Bill considered. It was evident if legislation was to be had the Republican Representatives must be in their places, and must do the legislation. If the gentlemen were absent on account of sickness, he hoped they would speedily recover and so come back. If they were absent by leave of the House, he was satisfied they would return. There were important bills to be passed. There were sitting wrongfully in this House members not entitled to sit here, and the Republicans owed it to themselves to seat the men who were entitled to seats, in spite of all the common scolds. [Republican applause.]

Mr. McMillin of Tennessee contended that a member must be present and refuse to vote in order to give the

Mr. McMillin of Tennessee contended that a member must be present and refuse to vote in order to give the Speaker the right to record his name. The gentleman from Illinois (Mr. Cannon) had said the Democrats did not want to consider the Diplomatic and Consular Bill. That bill appropriated 15 per cent more than the current law, set the gentleman having it in charge 15 per cent. more than the current law, yet the gentleman having it in charge attempted to push it through after fifteen minutes' debate, against the Democrats' protest, and the result was the waste of time of which complaint was made. Why should the Republicans complain of the Democratic side when they had the responsibility attending the large majority which they had made by questionable methods? If they wanted to do business, let them bring their members back from fishing, bring their members back from fishing

If they wanted to do business, let them bring their members back from fishing, electioneering and summer junketing. Mr. Grosvenor of Ohio said that when the Democratic party obstructed legislation he did not complain, nor did he wonder at the present exhibition of obstructive tactics made by the Democratic of the House. The school in which the Democratic party was trained was a school of obstruction. It was totally incompetent to be the leader of public sentiment, to project any new ideas of policy, or to carry into actual execution any affirmative-policy it might advocate before the people. While the country had been going forward with rapid strides, the Democratic party stood holding on to the coat tails of progress. The gentleman from Tennessee, Mr. McMillin, said no matter what the country wanted, it must not look to the Democratic side for assistance. Send for the Republican members if something was needed here. Do not depend on the Democratic party, for it is incapable morally, politically, and in every other way of doing anything, but hold on. The attempted fraud practiced upon the country by Democratic talk about farm mortgages had become a laughing matter. The Agricultural Committee had several important matters to report.

A Democrat: Why does it not do it?

Committee had several important matters to report.

A Democrat: Why does it not do it? Mr. Grosvenor: Because the Democratic party has obstructed legislation to the extent of more than one quarter of the time of this Congress.

Continuing, Mr. Grosvenor extolled the present code of rules. The Democrats would never repeal or materially modify this code. They would camp tomorrow night where the Republicans camped last night and say they were always in favor of this code. [Laughter.] Mr. Grosvenor reviewed the legislation enacted by Republicans in the present Congress, and then proceeded

to criticise the Democrats for the robstructive tactics. Let them be continued! Let them keep it up! Let them abuse their constitutional privilege to order roll calls, but let it be understood that the American people knew what they were doing and why they were doing it. The American people would decide between the Republican party and the Democratic party, and with their verdict they would be entirely content. [Applause on the Republican side and cries of "Thompson, Thompson," from the Democrats.]

The journal was then approved—yeas, 103; nays, 81.

The conference report on the Diplomatic and Consular Appropriation Bill was adopted—yeas, 114; nays, 66.

Mr. Funston of Kansas submitted, and the House passed, the report on the Agricultural Appropriation Bill.

The House then went into committee of the whole on the Land Grant Forfeiture Bill.

Mr. McAdoo of New Jersey spoke of the efforts of Democrats in the House to forfeit unearned land grants and of the steady opposition of the Senate to those efforts. Now, both houses being in the control of the Republicans, a compromise had been patched up. The pending measure might well be entitled "A bill to compound a felony with railroads which have stolen mittee rose and the House adjourned.

Another Interesting Day at the Assembly.

THE INSTITUTE PROCEEDINGS.

Two Lectures of More than Usual Interest-Assembly Notes-About Town-News and Personal.

LONG BEACH, July 10.—|Correspondence of THE TIMES.] This has been another interesting day of the assembly. The devotional hour this morning was well attended.

tended and interesting:

The Presbyterian Church will soon be too small to hold the children who gather there for "children's hour," at 9 o'clock. The little folks had a devotional meeting this morping for a change, which was led by J. H. Weber. For true childish faith and en-thuslasm it exceeded many such meetings

of "grown ups."

Rev. S. A. Thompson being absent, the Rev. S. A. Thompson being absent, the morning institute was addressed again by Rev. Thomas Stalker, who spoke on "Sacred Archæology," showing that Egyp-tian discoveries confirm the truth of the

tian discoveries confirm the truth of the scripture narrative.

Rev. W. A. Wright, of the school of the English Bible, followed the history of Abraham; his journey to Egypt; his return from there; separation from Lot; and the conquest of Chedorlaomer. The lecture was filled with descriptions of the country, its topography and products; the people and their customs, and the cities of Egypt and countries through which Abraham passed.

Dr. A. S. Dobba's lecture at 11 o'clock, "A Thousand Miles on a Camel's Back." Was preceded by Mrs. Osborne, who charmingly sang "The Lost Chord."

The Ductor lectured for over two hours, and gave his hearers a whole volume of information. Took them down the Nile and across to Suez, where he thinks the Israelies crossed the Red Sea. The shifting sands of Egypt makes railroading there more expensive than in the snowy sierras. The Red Sea is being slowly filled with sand, and the land at the north end probably was once sea. The Suez Canal requires constant dredging. The journey was over the desert country of the Sinal peninsula. The first part slong the Red Sea was a level country and the journey easy; the rest of it was through a desolate country, part of which is never visited. The company following the route of the Israelites. The atmosphere of that country is as clear as this and distances are equally deceptive. The Doctor enumerated the supplies they took for their journey. The outfit would stock a first-class country general store. The natives always have a fight when loading their camels, each trying to get the lightest goods. The old avenger of blood is on the track as in olden time, and although fights are frequent and seem to be vigorous, yet no one is hurt. The Arabs of that country have many dances. The war dance, in which each Arab defeats an imaginary enemy; the dancing women—rather a lewd affair; the dance of the women each whirling and beating castinets, such as Miriam performed; the religious dance of the men, each whirling and beating castinets, such as Miriam performed; the religious dance of the men, such as David performed before the Lord—one in which religious enthusiasm runs high; the political dance, in which the women sing the praises of the popular warriors. The Doctor "backheeshed" the women wherever he went, and they always sang his praise—the larger the backsh

The camel doubles up and takes a big load of everything, with a big crate on top filled with chickens, who get plenty of exercise without scratching. The rider who don't know which each of a camel gets up, first will be unceremoniously dumped in

He saw the ravens that fed Elijah, and ays they were not birds, but robbers—men. He says that the same laws that were given on Mt. Sinal had been written centuries before in Egypt and buried up by God to be brought out for this people.

The Doctor is enthusiastic and full of his subject.

Afternoon and Evening.

Dean Cherington lectured again before the school of the English Bible. Dr. Cher-ington gives solid, logical, terse lectures in

This evening from 7:30 to 8 o'clock Mrs. Osborne had charge of the musical prelude to the evening's lecture.

At 8 p.m. Rev. Dr. Kummer of Portland delivered his lecture, "In Quarantine." He said everybody travels nowadays. Periodically or oftener the question recurs, "Where shall we go?" Many are the answers. To cross the continent or the ocean or to travel around the world is not beautiful crains, such hotels and good companionship. It is only a question of time when we shall take our arrships and be aerial rather than terrestrial travelers. Where shall we go? It the East they answer, "To Long Branch, Saratoga, Ocean Grove, Chautangua, to the mountains." In Oregon, to Alaska, to the sound, to our snowy mountain peaks, to California. Here you should answer, "To Oregon." The lecturer shall we go? It the entertainingly told of the way in which over one hundred people on board spent their time in quarantine. There were games improvised, books read, amateur time time in quarantine. There were games improvised, books read, amateur threatricals performed, songs and innumerable other things done, among which was the hanging in effigy of the San Francisco Board of Health. The lecture also contained descriptions of San Francisco, San José, the Lick Observatory, the "Big Trees," Monterey and Del Monte. It closed with a description of the homeward journey over the ceibbrated Mt. Shasta route. The speaker culogised the beautful state of California, and paid a glowing tribute to his own beautiful city as his home.

AGRICULTURAL NOTES.

The apricot crop of Pomona this year

The apricot crop of Pomona this year will amount to over seventeen thousand dollars.

The Azusa Valley has not seen a boom yet. Property is going up in the whole valley, one rancher having refused \$70,000 for a forty-acre tract.

Azusa has shipped \$10,000 worth of strawberries already this season. That is the kind of a boom which is now setting in all over Southern California—a producing boom.—[Santa Ana Standard.

This warm wave is causing the apri-cots to ripen very rapidly, and will render it necessary for dryers to run nights and Sundays to keep up. The aggregate crop will be large, but not so heavy as was thought early in the sea-son.—[Riverside Press.

And there are millionaire farmers—
Mills of California got his start in the milk business, and one year ago this month he shipped off of his farm, thirty-five miles south of San Francisco, five hundred tengallon cans of milk a day, at 4 cents per quart. This would bring some \$290,000 a year.

How to Build a Henhouse. [Prairie Farmer.]
Raise the earth floor a foot above the outside surface. Those cranky perches are a snare to the unwary fowl. Take your ax and smash them down. Then have a tight inclined plane platform three feet high and thirty inches wide built along either side of the house. Make it so that the front edge is six inches lower than the back, and under this front edge hang a V-shaped trough, made in sections about four feet long, so that you can handle them easily, then fasten two perches, smooth half-round strips two luches wide, with the rounded side uppermost, about eighteen inches apart above the platform. Have these two perches exactly even in height. This will make the front one a little higher above the platform than the back one. Scatter a quantity of chaff, dirt or cut straw over the platform and all the droppings will roll down, or be scratched down by the hens, and fall into the trough. You can empty the sections of the trough into a barrel in five minutes any day, thus saving the manure in the best condition for use or sale and at the same time keeping the house nice and clean. If you keep plenty of dust, chaff or ashes scattered over the platform it will not need scraping once in three the same time the control of the cont

The many Pasadena admirers of the

art of Messrs. Gilbert & Sullivan are

excellent revival of Pinafore, which was accomplished at the Grand Opera-

house last night. Despite the familiar-

by mere buffoonery in performance and

painful paucity of melodic invention.

antries some time was whiled away, until it was decided to go on with the case, it being shown that no evidence had before been taken, consequently there could be no acquittal.

Attorney Millay then demanded a jury of twelve men. This furnished Deputy Slater a chance to bask in the sunlight for a good half hour, but when he returned be was surrounded by a coterie of some eighteen disgruntled citizens whom he caught mapping. With this batch of gentlemen Attorney Millay, assisted by Attorney Gibbs, toyed for some time, and by the time twelve men were found who were deemed sufficiently tried and true the clocks were striking 11. The jurymen were Webster Wockyns, G. E. Prosser, Capt. Wakely, T. Hobson, E. H. Lockwood, A. A. Chubb, F. A. Healy, W. A. Heiss, E. Canfield, Ben O'Neil, S. C. Pinney and J. B. Beebe.

C. M. Rankine, the husband of the owner of the horse in question, was the first witness. His testimony agreed practically with statements already published in these columns. The tail was cut off on the 6th of December. Plant was then in the witness' employ. He had asked permission to shorten the tail, which was emphatically refused by Mr. Rankine. On the following day the lower end of the tail was found beneath a pile of manure in the rear of the barn.

Mr. McLachlan next testified to the confession of young Plant made since his arrest, in which he admitted doing the deed and described how it had been done with the aid of a pocket-knife. Mr. Millay entered an objection to the introduction of the boy's confession as evidence, on the ground that it had not been given voluntarily. After Deputy Slater and Marshal McLean had been put on the stand to prove this, the objection was overruled. Adjournment followed until 2 o'clock, when Mr. Rankine was called upon to testify as to the appearance of the mutilated tail. He said it looked as if it had been cut off with a small knife. Veterinary White and the prisoner's mother and brother were also put on the stand. Their evidence was not important. The case was then argu

delightfully fresh and inspiriting, and this charming work of the English authors was set forth in a new light in

Today's market was a reaction from the depression of yesterday, and in some directions exhibited more life than has been seen for some weeks. Just before the close, Bidder Peabody & Co. engaged \$1,000,000 for export and precipitated a selling movement which reached all portions of the list, and a large proportion of the material gains were lost. The market closed weak at a concession on most of the list. weak at a concession on most of the list. However, it is fractionally higher tonight. NEW YORK STOCKS AND BONDS.

"A GROWL."

Mr. Editor: Although my taxes are small, yet they are as burdensome to me as if Papald much more. And as a tax-payer, I feel that I have a right to criticise those extravagances that are factors in the creation of high taxes.] that are factors in the creation of high taxes. I have in my mind the county hospital. No sooner does the impecunious citizen become broken down and debilitated, than he rushes off to the hospital. Even persistent dyspepsia and constipation are getting to be excuses for admission. Hence, allow me space to enter my feeble protest against further continuance of this pernicious practice. It costs the county many nicious practice. It costs the county many hard dollars for the treatment of every one of these unfortunates, and it is high time that they should know that they can save the county that expense, and themselves those distressing ail-ments, by the judicious use of a few bottles of Joy's Vegetable Sarsaparilla,—a remedy that within my observation is a sovereign cure for those too common disorders. If they won't take it they ought to be compelled to by some law that would meet the case. Under the circum stances a full hospital is inexcusable, — hence CITIZEN.

To Be Able to Undersell Skill Mus Used in Buying - The Foundation-stone of Low Rates.

PEOPLE'S STORE,

FRIDAY, July 11, 1899.
The main exertions and great stress that merchants of the new school aim to embody into the business of nowadays is to seek "to underbuy so as to be able to undersell.'
That experience alone and long apprentice
ship in the harness of merchandising ac qualitis one with this secret is a self-evident truth. The mere fact that store keepers in this town procure their supplies from the nerchant kings of New York's metropolic does not signify that lowest rates are procured. The closest scrutiny, the keenes judgment is required to ferret out the specialty houses wherein each separate one excels. We claim that we reach the bedrock of

prices, the foundation-stone of low rates and present them to our trade with just a mere percentage for handling, so that we do in many lines sell ours cheaper than they are sold even in the far East.

Our large trade is not enjoyed for any other reason than our being able to name lower prices and better rates on some wares than others, and it is our constant aim to serve our patrons in this respect faithfully making the saving more conspicuous as we grow and the sphere of our usefulness widens.

CATARRH. M. HILTON WILLIAMS, M.D.

By his Medicated Inhalations and Compou Probably no system of practice ever em-loyed has been so universally successful as hat introduced by Dr. Williams for the cure of Catarrh, Throat Diseases, Brenchitis, isthma and Consumption.

CATABRE. Catarrh is often regarded by the patient as a cold in the head, and he often expresses his astonishment at his remarkable tendency to contract fresh cold. Indeed he declares that he is scarcely free from one cold before he taxes another, and he is always exceedingly careful; it is also a matter of surprise to him that the cold always seems to settle in the head and threst.

saces another, and he is always exceedingly careful; it's also a matter of surprise to him that the cold always seems to settle in the head and throat.

At times many of the symptoms of catarrh seem to abate, and the patient is led to hope that the disease is about to wear off; but an other class of symptoms soon appear and he learns to his herror, that the disease is about to wear off; but an other class of symptoms soon appear and he learns to his herror, that the seems of the control of the co
